Context Project: Cultural Heritage

Monumentzo

Lightweight SCRUM #2

Group 2

Date
29 March 2012

Group members
Bojana Dumeljic (4103246)
Mick van Gelderen (4091566)
Kevin de Quillettes (4077482)
Salim Salmi (4089715)

Advisors
Martha Larson
Christoph Kofler (Teaching Assistant)

Table of contents

1. Introduction

In this document we determine which tasks are to be performed for each feature that is to be implemented during this iteration. Each task is assigned a group member that is going to perform the said task. There is also an estimation of the time that this will cost. The actual time it took is added at the end of the iteration. This is all in the table in chapter 2.

In chapter 3 is a short reflection on the main problems that were encountered during the iteration and the adjustments that were made to the iteration planning.

2. Iteration Planning

Feature			
Task	**Assignment to group member**	**Estimation of time**	**Actual effort**
Lire			
● Make index	Mick	1,5	
● Obtain graphically similar	&		
● Store similarity in database	Kevin	1,5	
● Check Lire	Bojana	1	
Tags			
● Extract tags	Mick	3	
● Select relevant	&		
● Store relevance in database	Salim	3	
● Check tags	Kevin	2	
Gather external information			
● Wikipedia	Salim	5	
● Google Books	Bojana	2	
● Wikibooks	Kevin	2	
● YouTube	Bojana	2	
● Vimeo	Bojana	2	
Search function			
● Query name and place	Kevin	3	
● Search results view	Bojana	1	
● Unit and acceptance testing	Mick	2	
View monuments (part I)			
● Metadata	Salim	3	

• Images	&		
• Map	Bojana	3	
• Architectural attributes			
Acceptance and unit testing	Mick	2	
Total		**17,4**	

Group Member	Estimated Time	Actual Effort
Bojana	**11**	
Kevin	**8,5**	
Mick	**8,5**	
Salim	**11**	

3. Short Reflection

TO DO AFTER ITERATION
